

BANABA FLUP

BANABA FLUP

## TECHNICAL RIDER SHOW “BANABA FLUP”, STREETFOOLS COMPANY

- Smooth and flat space (no stage) of about 10m X 8m deep (minimum height 4/5 m) with behind a wall or static background
- Audio mixer with 2 stereo inputs and two stereo outputs + 2 amplifiers with the power suitable for the stage space
- 220v current
- 3 barriers with concrete base or weights to stabilize them
- A lighting stand, minimum 3mt high to support a countdown panel (10kg weight more or less); the horizontal bar is not needed, is good if it ends with the tube

example:

- Dressing room near the show location, if possible with shower (we need a space to prepare/storage our boat...if it's in the dressing room, the door has to be minimum size: 200cm x 220cm)
- In the case of 2 shows on the same day/same space, a person to check the scenography and technical material
- Setup time 2/3h
- Dismantling time 1h
